

Leica GS05

Data sheet

Lightweight, but feature heavy

Small enough to fit in the palm of your hand and barely noticeable on top of your pole, the GS05 packs a lot of tech into just 0.75 kilograms. With 4G, UHF radio, a 10-hour internal battery, tilt compensation, and IP-rated durability, you'll be amazed at what this lightweight powerhouse is capable of.

Tilt compensating

The GS05 includes Leica Geosystems' proven tilt compensation, which is both calibration-free and immune to magnetic disturbances. Forget the bubble and focus on the task at hand, saving time and effort. Measure points without breaking stride and stake points quicker and simpler than ever.

Trustworthy

The GS05 is built on Leica Geosystems' reputation for quality. It seamlessly integrates with Leica Captivate field software, Captivate tablets and controllers, Leica Infinity, and GeoCloud Drive, and can even be combined with total station operation as a SmartPole. Maintenance, service and support are all available through Active Customer Care.

¹ Enabled with article 1006940 - GS05 Tilt Compensation.

² Measurement precision, accuracy, reliability and time for initialisation are dependent upon various factors including number of satellites, observation time, atmospheric conditions, multipath etc. Figures quoted assume normal to favourable conditions. A full BeiDou and Galileo constellation will further increase measurement performance and accuracy.

³ RTCM 3.2 MSM is the RTK data protocol supported when UHF is being used in Base or Rover mode.

⁴ Available for the GS05 LTE variants only.

⁵ Depending on the version. In order LTE Worldwide variant | LTE Regional variant.

⁶ Available for the GS05 UHF variants only.

⁷ Might vary with temperature, age of battery, transmit power of data link device and use of wireless communication devices.
